

CARBON FOOTPRINTING AND EMISSIONS REDUCTIONS

Are you being asked to provide carbon emissions data?

- Do you have regulatory compliance obligations to report under ESOS, SECR or EU-ETS?
- Are you being asked by your customers to report the carbon footprint of your products or services?
- Is the lack of carbon reporting or emissions reduction targets in your organisation acting as a barrier to new clients or markets?
- Are your funders requesting additional information regarding your carbon emissions?
- Do you need help to collect and report your carbon emissions data for an accreditation programme?
- Do you need support, ideas or solutions to achieve emissions reductions within your organisation and/or your supply chain?

What are the drivers for action?

The UK Government has made a commitment to achieve net zero by 2050, thereby ending its contribution towards climate change. Net zero means that greenhouse gas emissions must be reduced as much as possible, and any emissions that cannot be reduced or eliminated will have to be balanced through carbon sequestration. Organisations will therefore be required to account for their own emissions and to consider the supply chain emissions of the materials and services they use, including primary production, processing and manufacturing, transport, etc.

How can RSK help?

We can help you to measure, analyse and verify your emissions, develop mitigation strategies to reduce those emissions, and communicate the results. We support clients to

- conduct carbon footprinting for their organisations and/or suppliers
- analyse data using off-the-shelf or bespoke, in-house carbon calculators
- validate and assure existing footprints
- set measurable reduction targets and develop strategies to achieve them
- advise on and support offsetting strategies
- develop reporting protocols for legal and other compliance requirements.

RSK Experience

RSK has delivered hundreds of assessments to support companies in achieving carbon neutrality. We do this by delivering greenhouse gas assessments to a variety of clients across a wide range of sectors to determine their carbon footprints, and the offsetting requirements of their organisations, activities and products.

Through its longstanding partnership with offset provider Natural Capital Partners, RSK supports organisations in achieving CarbonNeutral® certification, including for their company, products and activities.

Key clients

- Bespoke carbon calculator tool development: Scottish Land Commission, HS2 subcontractor requirements
- Carbon management plans and reduction strategies: Royal Town Planning Institute, Paysafe, Hg Capital, SITA, Bulldog Skincare, Bristol Airport
- Emissions scenario forecasting: Gatwick Airport, Royal Town Planning Institute
- CarbonNeutral® company: BBC Studios, Sky Group, Nestlé ReadyRefresh, SH Hotels & Resorts, Nordea Bank, Permira, Pokémon Company International
- CarbonNeutral® product (life cycle assessment): Fever-Tree, Icelandic Water Holdings, The Wine People, Waiakea, Wessanen (Clipper Teas), Denmaur Paper, Dignity Funerals, Kimberly-Clark
- CarbonNeutral® production: BBC Studios Productions, Albert (BAFTA) carbon tool
- CarbonNeutral® business travel: Logitech, Prudential Financial, KPMG, Pinsent Masons, WSH Group
- CarbonNeutral® event: Burberry Spring/Summer London fashion show, Laureus World Sports Awards, Stella McCartney Winter 2020 show

“FOR MORE THAN TEN YEARS, NATURAL CAPITAL PARTNERS AND RSK HAVE SUCCESSFULLY COLLABORATED TO DELIVER HIGH-QUALITY ENVIRONMENTAL REPORTING TO COMPANIES ACROSS THE WORLD. THE DEPTH OF RSK’S EXPERTISE AND ITS ADAPTABILITY TO CHANGING DEMANDS HAVE BEEN CRITICAL IN ENSURING OUR CLIENTS’ NEEDS ARE MET AND THEIR EXPECTATIONS ARE EXCEEDED.”

Tom Popple, Business Development Manager,
Natural Capital Partners
